

## Reference for Care Residential Property Management

I first used Care Residential Property Management in 1999 when I was overseas for 7 months. The tenancy proceeded smoothly and the house was well looked after so when decided to rent the property on an ongoing basis in 2008, I had no hesitation in going back to them.

Care Residential Property Management found good tenants for my Newtown property and there were never any issues with the rent arriving on time. The Company has a wide network of tradespeople to look after the inevitable maintenance issues that arise and Carolyn effectively managed the periodic inspections to ensure that the tenants maintained acceptable standards. Carolyn and her team were also highly professional in their communications and record keeping which made for a low stress experience.

I have no hesitation in recommending Care Residential as property managers.
